The background of the image is a dense, textured stack of dry straw or hay bales. The straw is light tan to golden-yellow in color, with many individual stalks visible, creating a complex, layered pattern.

De ferdige halmhusene i Aalborg er bygget med 60 prosent redusert CO2-utslipp. (Alle foto: PKAE Ejendom)

## Flytter inn i halmhus med 60 % lavere CO2-utslipp

Fra sommeren 2025 må husbyggere i EU innfri stadig strengere krav til reduserte CO2-utslipp fra nybygg. Tre nye halmhus i Aalborg er et svar på det.
